

# Introducing **ECLIPSE ULTRA™**

*THE Sustainable Marine Fabric of The Future*

Technology has come along way. Entering into the marketplace using the same sophisticated technology as outdoor gear, we introduce Eclipse Ultra.

One of the earlier breakthroughs of waterproof, breathable backing supported by Eco-friendly solution dye polyester.

- Superior Breathability
- Anti-Microbial
- 50% Water Reduction
- 25% Energy savings compared to conventional methods
- 4 Year Warranty
- Chemical Use Reduction By 50%
- Fade Resistant
- Abrasion Resistant
- Trusted Durability
- Weather Resistant

This unique coating functions as a membrane layer, transferring moisture from inside of the cover to the surface of the fabric, allowing to air dry. Our solution dye process ensures the color is evenly distributed throughout the fabric, while simultaneously improving color fastness. Engineered to protect against weathering and sun exposure.
